

## Alien Invasion!

Aliens have invaded this word search! Every time the letters ET appear in this puzzle, they've been replaced by an alien's head. (Those might look like pictures of Spider-Man, but trust me. They're aliens.) You don't need a ray gun to shoot down these spacemen—just circle the eighteen words, which can be found reading up, down, left, right, and diagonally, and either forward or backward.
