

Just One of the Guys

Each of the nineteen words can be found in the grid below, but 21 of my friends have dropped by to make this word search a little more challenging: Every time a guy's name appears in the grid, it's been replaced by a small icon of a man. (So if PUPPETEER was in the grid, the name PETE would be replaced.) Some of the guys in the grid share the same name, and a couple of words will cross more than one icon. Can you name everyone in the puzzle and find all the words?
